

SPALDING seating

ACCESSORIES

Armrests

Spalding seating can be manufactured and supplied to include a number of seating accessories to ensure that the product is right for your scheme. The Spalding seating range is available with or without armrests. Mild armrest brackets will be hot dip galvanised as standard, with an optional powder coated finish available. The Spalding armrest is supplied with a top timber slat, to match the seating slats.

LED Lighting

Coloured LED lighting can be supplied with your Spalding seating.

In its basic form, the lighting is available as cool white, warm white, blue, green or red LED units. More complex lighting can be supplied, including twilight switches, PIR sensors, timers, infrared, ultraviolet and royal blue emitters, PWM dimmers, RGB, UPS, DMX and remote control units.

Our LED lighting units can handle all of the tasks formerly undertaken by tungsten, halide and fluorescent lamps, and out-perform them in every department. They are extremely flexible - we can supply almost any configuration of lighting to a client's specification using our standard lighting unit.

The lighting units can be powered by either a low voltage DC supply or mains electricity. The choice of light levels and power units is also broad. Our standard power supply pumps out 12 Volts at 4 Amps, in LED terms enough for a very bright bench or seat. The entire range is from 1 Watt to 1,000 Watts.

Anti-skateboard studs

We are able to supply the benches and seats with stainless steel anti-skateboard fittings. The fittings are screwed to the outside edges of the 145x45mm section FSC timber slats.
