

PLANTER accessories

TIMBER SCREENS

General

Street Design can manufacture and supply planters with integral timber screens. Planter screens are useful for creating private areas on roof gardens and residential projects, as well as hiding unsightly features. The horizontal slats are available in FSC treated redwood or FSC iroko hardwood. The timber slats can be left natural or can be stained to a colour to suit the scheme.

Specification

The planter posts are extended to suit the height of screen required. 70x22mm horizontal timber slats are screw fixed to the planter posts. The horizontal slats are fixed alternately on both sides of the uprights.

Timber

All timber used will be FSC.

Treated Redwood

FSC Redwood will be Wolmanit CX pressure treated with a 30 year treatment, suitable for in-ground contact.

Iroko hardwood

FSC iroko hardwood is naturally durable and does not require a life prolonging treatment. Iroko hardwood will not take a treatment, due to the close grain of the timber.

Fixings

The horizontal slats are screw fixed using size 10 pozi head wood screws with a BZP finish. The timber slats will have a countersink prior to fixing.

Standard finish

As standard the horizontal timber slats will be supplied with a natural finish. FSC treated redwood slats will have a greenish-brown tint to the preservative treatment. FSC iroko hardwood will have a light golden yellowish colour. In time, due to natural weathering, both natural finishes will turn a silver-grey colour.

Optional finishes

Translucent stains

As an optional extra, the timber slatted screens can be stained with a translucent wood stain to suit your requirements.

Street Design can apply 3 coats of Ronseal quick drying water based wood stain, available in a range of colours.

Other stain manufacturers

If required, other translucent wood stains can be specified, to suit your particular project.

Opaque stains

As an optional extra, the timber slatted screens can be stained with an opaque wood stain to suit your requirements. A specific stain manufacturer and colour can be applied to suit your particular scheme.
